Motorisation - overview

SPECIFICATIONS

Motorisation has been one of the main driving factors behind positioning Window Treatments' blinds and awnings as leaders in the market place.

Thanks to new technology in the motorisation industry we can now offer the option of remote controlled automation on most of our blinds and awnings.

Motorisation also eliminates the need for chains or cords and allows easy accessibility to high or difficult to reach windows. It is easily installed as retrofit and can be integrated with home or commercial building automation systems. At the press of a button, you can lower or retract your blinds to any point, individually or as a specified room or area grouping.

Motorisation by Window Treatments is provided by hard wired or wire free, electrically powered discreet and quiet tubular motors. They can be operated by wall mounted switch, remote control or interfaced with your building management or facade management system. The motors are installed directly into the blind head rail or tube. They are compact, quiet and can operate almost all sized blind. Window Treatments uses motors and control systems by French company Somfy®, Rollease Acmeda® and Dooya, all of whom are considered world leaders in automated systems and blind hardware.

Somfy®, Rollease Acmeda® and Dooya tubular motors are some of the world's quietest and with a radio receiver built inside, it is simply a matter of plugging them into a power point. Programming can then be managed easily with the use of the radio remote control or in most cases your smart phone/iPad etc.

Stress simulation tests are performed and their products are tested under extreme conditions. All motor systems are certified according to current technical and safety regulations.

Window Treatments, in conjunction with Somfy, Rollease Acmeda® and Dooya guarantee excellent product quality, installation and simplicity of use for all customers. Motors are guaranteed for five years.

Window Treatments can install motors or automated systems when you are remodelling or building a new home or commercial building, or we can retrofit to an existing system. We can convert most types of blinds and awnings.

Window Treatments automation systems are designed to improve your comfort, security and energy efficiency – making life easier. Our customer representatives throughout New Zealand as well as our Technical Services Manager, can consult with you or your architect at the planning stage for all domestic or commercial projects requiring automation.

Motorisation is available for:

- Skyight Blinds
- Honeycomb Pleated Blinds
- Palladio Folding Arm Awnings
- Venetian Blinds (Aluminium, New Image)
- Roller Blinds
- Blocco Blinds
- Italia Box
- Terrazza Conservatory & Pergola Awnings
- Mystique
- Louvre Roof's
- Securo[®] Exterior Blinds
- Securo[®] Interior Blinds

Somfy® Roller Blind Motorisation

- Wired

Window Treatments offers three wired motors capable of lifting up 19.6kg. Hardwired motors are always preferable, although Somfy battery blinds are available when hardwiring is not possible so it is important particularly for new builds that pre-wiring should be considered for any automation requirements.

Any blind on an 83mm tube requires an Altus 6/17 motor

	Sonesse 3/30 Motor	50mm/63mm Tube	9.6kg
	Sonesse 6/20 Motor	50mm/63mm Tube	19.6kg
	Altus 6/17 Motor	83mm Tube	14.5kg

Minimum/Maximum Sizes

Window Treatments can produce a single motorised roller up to 5000mm wide with a 2250mm drop. As the width decreases, a larger drop is possible. Multi-link blinds can be produced up to 8000mm wide with a 4000mm drop, however we recommend blinds with drops exceeding 3500mm are installed with wire guides.

SPECIFICATIONS

Rollease Acmeda - Roller Blind Motorisation

Window Treatments offers three wirefree and wired motors capable of lifting up to 9.6kg. The Li-ion Battery powered motors are great for hard to reach places, especially when equipped with a solar panel. With the blinds being raised and lowered once a day, battery power will last approximately 3 months depending on fabric weight. A charging cable is provided and must be connected to the motor for 6 hours to provide optimum charge (standard 4mtr length supplied, 0.22mtr, 1.22mtr and 2.44mtr extensions available as optional extras). Alternatively, a solar panel charger can be fitted in the window to keep the motor charged allowing two cycles per day (once up and once down).

Minimum/Maximum Sizes

Window Treatments can produce a battery powered motorised roller blind to any size shown on the table. If your window is larger than our maximum size, our wired motorization offers more lifting capacity. Note: the minimum size for a wirefree multilink roller blind is 750mm.

Blocco Honeycomb Blind

- Motorisation options & Manual Control

Motorised Operation:

For windows that are out of reach such as conservatories or some commercial installations, Window Treatments can motorise your Blocco Honeycomb blinds with a hard-wired Dooya 12v motor, or by an external rechargeable lithium battery. The raising and lowering of the blind is achieved with a rotating spool within the head rail which is driven by motor.

A small solar panel can also be connected to the battery pack to boost the operational life of the battery.

Performances	LV25 - B44	Blind Type >	Aluminium 25mm (Short Cone)	Aluminium 25mm (Long Cone)
Torque	0.4nm	Min Width	600mm	670mm
Speed	40rpm	Max Width	2400mm	2400mm
Rated Voltage	24V	Min Drop	300mm	300mm
Rated Current	0.3A	Max Drop	1700mm	3000mm
Running time before thermal cut off	7 Min			
Motor Weight	0.145kg			
IP Rating	IP 40			

Wall switches or Remote controls can be used to manage a blind or groups of blinds with tilting slats equipped with RTS technology as well as activate or take control of a sun sensor. With the Telis Mod/Var with Scroll Wheel, slats are precisely positioned using a central thumbwheel. Up, down, stop and preferred position settings are achieved using the « my » key. Available in Pure, Silver and in single channel model

Honeycomb Pleated - Motorisation

Motorised Operation:

For windows that are out of reach such as conservatories or some commercial installations, Window Treatments can motorise your Honeycomb pleated blinds with a hard-wired Dooya 12V motor, or by an external rechargeable lithium battery. The raising and lowering of the blind is achieved with a rotating spool within the head rail which is driven by motor.

A small solar panel can also be connected to the battery pack to boost the operational life of the battery.

Control options: The blinds can be operated by remote and/or integrated into a BMS system via a Dooya HUB.

or

DC1276

12V Rechargeable Battery Wand

- For all DOOYA-DC motor (<12V, 20W)
- Power: 11.1V 2.6Ah
- Working life: 600 charging cycles
- Dimension: 225mm x 27.5mm x 27.5mm

Awnings - Motorisation Italia Box

SPECIFICATIONS

Motorisation

Window Treatments' motorised awnings are surprisingly simple and inexpensive. All awning systems can be automated using Somfy's range of motors. These robust motors set the standard for awning automation. Somfy's wide range of weather sensor options include sun, wind and rain control.

An automated awning is capable of extending or retracting automatically when it is needed. The benefits of this include protecting your awning from wind damage, making the building appear occupied, and maintaining a comfortable indoor temperature which can reduce cooling costs. A variety of control options are available to suit different automation requirements such as individual control, multiple control, group control, master control or automatic control using weather sensors.

Window Treatments NZ Ltd is an Authorised Somfy Automation Expert. For further information on how a Somfy Automated solution can enhance your design, please contact motorisation@window-treatments.co.nz

Italia Box Motorisation (optional)

Italia Box uses six different types of motors for automation depending on the size of the awning installation. Refer to Motor selection chart.

Motor Selection		Width <2.5m	Width >2.5m	4 Arms
Italia Box	RTS	Altus 10/17	Altus 25/17	Altus 40/17
	WT	Jet 10/17	Gemini 25/17	Mariner 40/17

Awnings - Motorisation Palladio

Motorisation

Window Treatments' motorised awnings are surprisingly simple and inexpensive. All awning systems can be automated using Somfy's range of motors. These robust motors set the standard for awning automation.

Somfy's wide range of weather sensor options include sun, wind and rain control.

An automated awning is capable of extending or retracting automatically when it is needed (note: pitch can only be manually adjusted). The benefits of this include protecting your awning from wind damage, making the building appear occupied, and maintaining a comfortable indoor temperature which can reduce cooling costs. A variety of control options are available to suit different automation requirements such as individual control, multiple control, group control, master control, automatic control using weather sensors and manual override in the event of power failure (Only when model CSI 40/12 motor is used). Awnings are installed by Window Treatments installers with Somfy 230v Tubular motors which are housed inside the awning tube. The motors have a 3m power flex which is to be connected to the power supply by a registered Electrician. Window Treatments can recommend an electrician to complete this work if necessary.

Window Treatments NZ Ltd is an Authorised Somfy Automation Expert. For further information on how a Somfy Automated solution can enhance your design, please contact motorisation@window-treatments.co.nz

Palladio Motorisation (optional)

Palladio uses six different types of motors for automation depending on the size of the awning installation. Refer to Motor selection chart.

Louvre Roof - Motorisation

Motorisation

- All Louvre Roofs are motorised with a retro-styled stainless steel 240v Elero Picolla XL-P (German) motor (Manual control is not available).
- Integrated isolation relays enabling parallel connection of several actuators.
- Weather-resistant 230V linear actuator made of stainless steel.
- Additional isolation relays are not required.
- Reduced installation expenditure and higher security against incorrect use.
- Control of several linear actuators in parallel (without synchronisation).
- Motor can be installed on either projection side of the louvre roof but the selected side must be stated on the order.
- Motor is installed on the top of the projection beam (100mm clear space is required above the projection beam the motor is installed upon).
- Louvres in the open position project 75mm beyond the top of the projection and cross beams therefore 75mm clear space must be provided on all beams and cross bars to allow for this rotation.
- Louvres in the open position are flush with the underside of the projection and cross beams.
- Control options are:
 - o Somfy Remote with Receiver - optional upgrade with a Connexoon Automation Hub.
 - o Hard wired to a wall switch or Hard wired to a Post mounted switch
- Wind or Rain Sensors. Note: it is not possible to install both a wind sensor and a rain sensor.

Somfy Remote

Post mounted switch

Electrical Connections

The Louvre Roof is installed by Window Treatments installers with a 240v Elero Picolo XL-P external motor which is fastened to the middle of the top side, of one of the Projection Beams. The motor has a grey 4m power flex which is to be connected to the power supply by a registered Electrician. Window Treatments can recommend an electrician to complete this work if necessary. Power cables and connections can be installed by the registered Electrician, inside or outside the hollow louvre roof beams and posts, however all such work must conform to the Electrical Code.
