SERVICE

Ready Made Blinds and Curtains are the ideal way to create smart, modern elegance in your home, office or investment property at unbelievably low cost.

Ready Made Blinds and Curtains are an excellent, inexpensive alternative to made-to-measure blinds and curtains. Increasingly popular, they are **approximately half the price of a made-to-measure blind or curtain** without compromise in quality or style. They come in standard widths and drops which suit most New Zealand windows.

FREEPHONE

Ready Made *Blinds*

We can resize Ready Made Blinds to fit almost any window size. We have hi-tech cutting equipment in our purpose designed warehouse. Resizing cost is minimal and is available for cutting the width and if required, reducing the drop.

Ready Made *Curtains*

Ready Made Curtains are available in standard finished drops of 220cm and in 2 width options. One pair of standard curtains and an extendible track can provide coverage up to 280cm and coverage for areas wider than 280cm are achieved with additional track and curtain drops.

Stylish
linen-look
weave

BLINDS

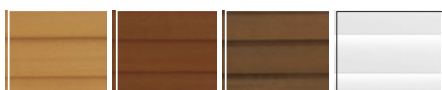

READY MADE
Blinds & Curtains

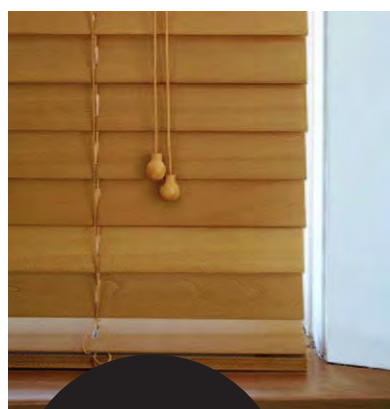

WOOD (BASSWOOD):

Ready Made Wood Blinds are manufactured from a timber species called Basswood which is a very hard and stable American hardwood. This makes it an ideal Timber for making into blinds. Basswood blinds use a wand (on the left hand side) for tilting the slats and cords for raising and lowering the blinds.

50mm Slat

Golden Oak Rimu Teak White

If one of our MANY standard size blinds aren't quite right, we offer resizing for a small charge.

POLYMER (WOOD LOOK):

50mm Polymer (wood-look) blinds are manufactured from 100% PVC with a timber look embossed finish on the surface of the slats. This finish is particularly useful in damp areas such as kitchen, laundry & bathroom windows. The Polymer surface is impermeable to moisture so regular cleaning with a damp cloth will not cause any harm to the blinds. There is a tilting wand (on the left side) and cords (on the right side).

50mm Slat

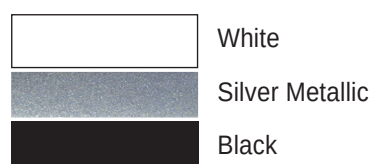

Off white White White Wash Sandstone

ALUMINIUM (VENETIAN):

Venetian Blinds are versatile and affordable and suitable for most domestic and commercial situations. From the kitchen to lounge, boardroom to bathroom and conservatory to office foyer, Venetian Blinds offer a practical and attractive solution. Ready Made 25mm Venetian Blinds are constructed using Aluminium slats with matching Steel Head Rails and Bottom Rails. There is a tilting wand (on the left side) and cords (on the right side).

25mm Slat

White Silver Metallic Black

All our blinds come complete with fitting instructions, brackets and screws necessary for installation.

FREE samples are available on request.

Please contact us online at www.rmhc.co.nz or Phone 0800 77 00 44

Colours shown are indicative only. Note: An exact colour match between the samples supplied and the finished blinds cannot be guaranteed.

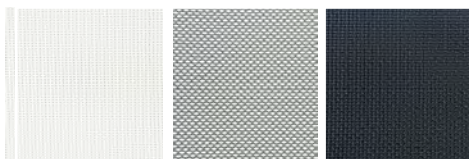

BLINDS

READY MADE
Blinds & Curtains

ROLLER BLINDS (SCREEN FABRIC)

Ready Made Roller Blinds in Screen Fabric are ideal for sun control, without losing your view and privacy during the daytime. They are made from 30% polyester & 70% PVC which is resistant to UV. The Nylon chain has a positive movement and also a direction guide on the control end to assist with the operation of the chain.

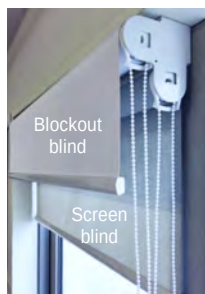

Arch White Rock Grey Monte Carlo

All Roller blinds are supplied with white componentry

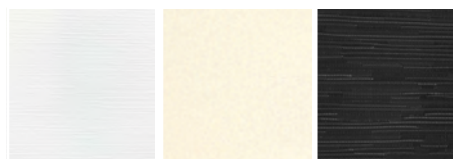

DOUBLE ROLLER BLINDS

Our new Double Roller Bracket supports installation of both a Blockout Roller and Sunscreen Roller. This option offers great flexibility throughout the day to night period, with the Sunscreen Rollers offering daytime privacy and glare control while the Blockout Rollers are ideal for full privacy, insulation and light control at night.

ROLLER BLINDS (BLOCKOUT FABRIC)

Ready Made Roller Blinds in Blockout Fabric are ideal for both sun and total light control, and ensuring your privacy at all times. They are made from 100% polyester which is resistant to UV. The Nylon chain has a positive movement and also a direction guide on the control end to assist with the operation of the chain.

White Weave New Cream Black Weave

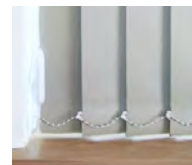

Grey Weave Stone Weave

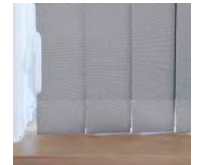

VERTICAL BLINDS (BLOCKOUT & SCREEN FABRIC)

Ready Made Vertical Blinds in Blockout and Screen fabrics provide sun control with a classy soft furnishing look to your home or office. The perfect solution to cover ranch slider doors and windows.

All Vertical blinds are supplied with white componentry

Colours shown are indicative only. Note: An exact colour match between the samples supplied and the finished blinds cannot be guaranteed.

BLINDS - MEASURING GUIDE / CHART

Note: Blind sizes are always measured by the millimetre (mm)

STANDARD SIZE BLINDS:

Venetian: The width listed online for our Standard Size blinds does **not include the clearance required for installation**. If you plan to install a standard size blind inside a frame (Inside Fit), please contact us for the clearance requirements.

Vertical and Roller Blind: Standard sizes will be supplied with the width x drop as listed online, this width **includes the required clearance for installation**.

CUT TO SIZE BLINDS:

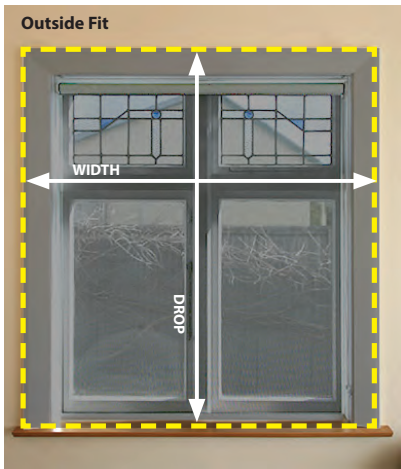

Blinds “cut to size” will be supplied based on the measurements you supply. Please use the instructions below to measure your window and calculate your measurements. You will need a steel measuring tape and pencil and paper. You will need to measure to the nearest millimetre (mm).

Please choose whether you want your blind(s) to fit **INSIDE** or **OUTSIDE** your window frame(s).

INSIDE FIT:

Blinds are more commonly fitted inside the window frame. Please use your tape to measure the width first and drop last. Measure tight, from wood to wood, inside the frame. *Please ensure you give us your exact (tight) measurements as we will make the necessary deductions off these sizes to allow for the clearance required for installation brackets/fittings.*

OUTSIDE FIT:

An outside fit is useful when there isn't enough space for the head rail to fit internally. Please measure to the outside of your architrave to achieve maximum light control and privacy. If you don't have architraves we recommend adding 200mm to the window's width measurement (100mm for each side) and a further 100mm to the drop measurement.

TIP: It's a good idea to measure the width in three places, top, middle and at the bottom as sometimes there can be small variances. Please take the smallest of the three measurements.

NOTE: As deductions for installation brackets/fittings are not necessary for an outside fit we make the blinds to the finished measurements that you supply us.

WINDOW LOCATION	TYPE OF BLIND	FIT Inside or Outside	WIDTH (mm)	DROP (mm)	QUANTITY	PRICE

TO OBTAIN PRICES:

- Call us on **0800 77 00 44**
- Email us at **service@rmbc.co.nz**
- Visit our website: **rmbc.co.nz**

IMPORTANT:

The accuracy of your measurements is essential for a correct and proper fit of your blinds. We cannot be accountable for inaccurate measurements, so if you have any doubts be sure to double check before placing your order. As a further safeguard, if you order online we will always phone you to confirm your sizes.

CURTAINS

Ready Made Curtains in a classic linen-look weave, have been selected for their timeless appeal. They are professionally sewn in a quality curtain-weight fabric and fully lined with a hard-wearing insulating fabric.

Exclusive to Ready Made Curtains the **Textrar** range is available in a carefully curated palette of both classic and contemporary colours to suit every interior design preference.

Ready Made Curtain headings are in the timeless Pencil Pleat which ensures both elegant draping and flexibility in width adjustment. You can gather the curtain to fit whatever width you are dressing and attach to our extendible curtain track, using the curtain hooks included with your Ready Made Curtain.

Pencil Pleat curtains have a tape running through the top of the curtain head and strings which run within the tape. These strings can be pulled up to achieve the desired gather and curtain width to easily provide both fashionable drapery and functionality.

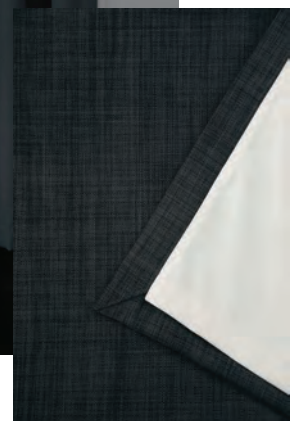

Fabric choice is an essential component of curtain selection. Ready Made Curtains are woven in a quality curtain-weight 100% Polyester which means they are:

- Durable and strong
- Won't fade or deteriorate as quickly as many other fabrics
- Mould resistant and antibacterial
- A good insulator

All Ready Made Curtains are Fully Lined with a 100% Polyester with acrylic backing. The lining creates another insulation layer and ensures a darker room. This hard-wearing lining fabric also prolongs the appearance and life of your curtains and protects them from harmful UV rays.

All our curtains come complete with fitting instructions and curtain hooks.

Care of your Ready Made Curtains:

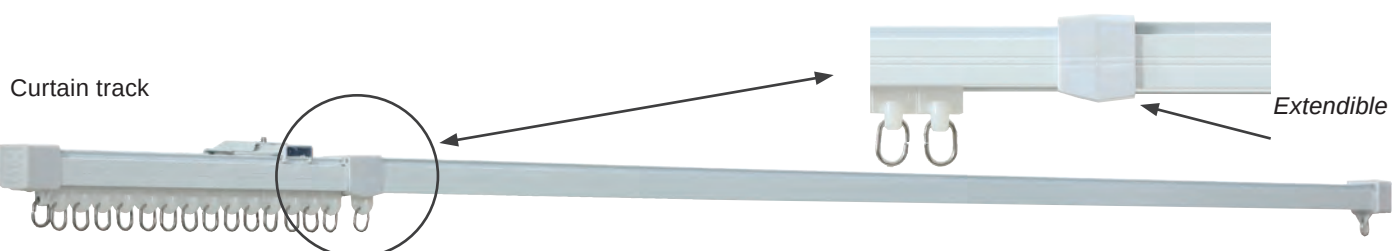

Remove hooks before cleaning. Either gently vacuum with appropriate attachment or gently cold hand wash separately. Do not soak, bleach, rub, wring or tumble dry. For best results hang curtains by their hooks to dry.

Ready Made Curtain Tracks

If you require curtain tracks, Ready Made Blinds & Curtains can supply you with tracks separately or at the same time as your curtain order. These include high quality extendible aluminium curtain tracks, complete with glides, screws and brackets.

The aluminium curtain track is corrosion resistant and the quality wheeled runners glide effortlessly along the track as the curtain is drawn.

Available in 2 sizes: 120cm-210cm, and 200cm-290cm

FREE samples are available on request.

Please contact us online at www.rmbl.co.nz or Phone 0800 77 00 44

Colours shown are indicative only. Note: An exact colour match between the samples supplied and the finished blinds cannot be guaranteed.

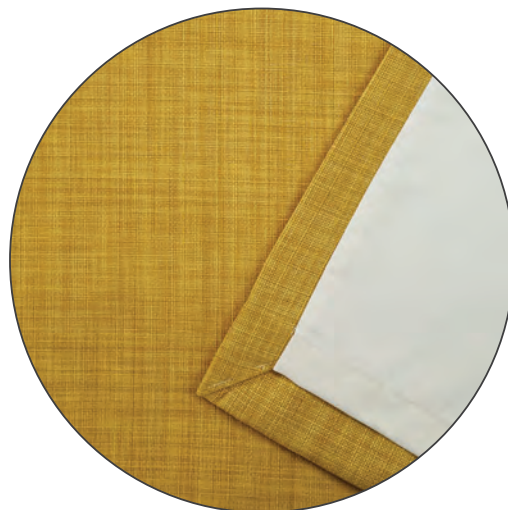

CURTAINS

TEXTRAR

Exclusive to Ready Made Curtains the Textrar range is available in a carefully curated palette of both classic and contemporary colours to suit every interior design preference. **There are two standard curtain pair widths, 210cm & 280cm.** The two standard widths refer to the approximate width of the **combined** width of the pair. **Our standard Curtain Drop (height) is 220cm.**

CURTAINS - MEASURING GUIDE / CHART

Note: Curtain sizes are always measured by the centimetre (cm)

CURTAIN PAIR WIDTHS (CM):

There are two standard curtain pair widths, 210cm & 280cm. The two standard widths refer to the approximate width of the **combined width of the pair**, after you have pulled the strings on the headers to achieve the desired gather. To help when ordering, just enter the overall width in cm of the opening that you wish to cover and the system will automatically select the correct curtain pair width for you. Curtain hooks are supplied free of charge with your curtain. **Remember, the width you enter will always be the same as the curtain track length.**

Handy hint: If you wish to have the stacking of the curtain away from the opening so that your view is not blocked, make sure that you allow extra width so that the track and curtains can stack past the sides of the window frame. This is also a very good practice to help keep your home warm in the winter and to ensure privacy at night.

To calculate how much wider you'll need to make the curtains to ensure most of the stacking is past the window frames, add between 50cm-60cm for every 200cm of width. Example if the opening from one side to the other side of the window frame is 200cm wide, order the width of your curtain and track at approximately 250cm -260cm.

If in doubt just email us or call on 0800 77 00 44.

Drop (height cm)

Our standard Curtain Drop (height) is 220cm. This is the finished height from the very top to the very bottom of the curtain. Curtain tracks can be installed onto the window frame or more commonly, installed above the window frame onto the wall. This means that unless you particularly wanted to adjust the height of the curtain, the position the curtain track will always be approximately 220cm from the floor/carpet/tiles etc.

Sew to Size (drop only) If you prefer for the drop of the curtain to be less than our standard 220cm, simply measure the drop you require and add this measurement when you place the order (additional fee applies).

Curtain Tracks:

Tracks can be ordered with or without curtains by simply ticking the box on the order. If curtains are ordered at the same time, the tracks and associated parts will be supplied together with curtains. Our track prices include all associated parts such as glides, brackets, screws and wall plugs.

There are two standard sized extendible white curtain tracks:

- 120cm extendible to 210cm which includes 3 brackets, 25 glides and screws.
- 200cm extendible to 290cm which includes 4 brackets, 36 glides and screws.

All you need to install the tracks will be a level, drill, measuring tape and a screwdriver.

Tools for measuring: Steel measuring tape, pencil and paper. You will need to measure to the nearest centimetre (cm). Please use the instructions below to measure your window and calculate your measurements.

Please choose whether you want your curtain(s) to fit **INSIDE** or **OUTSIDE** your window frame(s).

OUTSIDE FIT:

An outside fit is the most common option for curtain installations. Make sure you allow extra width to ensure the stacking of the curtain doesn't block your view and provides generous coverage for both privacy and insulation.

INSIDE FIT:

Although not common, curtains can be installed inside the window frame but remember that the stacking of the curtain will reduce your view and you will need to make arrangements to shorten the standard drop (height) of the curtain.
